

## Fish Work Group Meeting #2

### Wednesday, October 22; 10:00am – 11:30am

#### **Materials:**

- Fish species list and potential groupings Page 3 4
- Example fish density map product Page 5
- Example fish raw abundance product Page 6

Call in: 1-855-244-8681; Meeting #: 738 311 944; Password: 1234

#### Agenda:

- I. Welcome, introductions, etc. (Nick Napoli and Emily Shumchenia, NROC)
  - Roll call
  - Process for follow-ups and outreach

#### II. Species (Mike Fogarty, NOAA)

- Overview of species captured by NEFSC, NEAMAP and MA state trawls (see species list on page 3 - 4
- Options for modeling approximately 50 species; prioritization?
- Trawl standardization among sampling programs
- Grouping by functional guild
  - i. Planktivores
  - ii. Demersal Piscivores
  - iii. Demersal Benthivores
  - iv. Molluscs
  - v. Crustaceans

#### III. Product options (Mike Fogarty, NOAA)

- Interpolated (density) maps (see example on page 5)
- Bubble plots or plots of raw abundance (see example on page 6)
- Animation options: see
   http://www.nefsc.noaa.gov/ecosys/climate\_change/historical.html

# IV. Species that are important but not well-captured by NEFSC, NEAMAP and MA trawls (Mike Fogarty, NOAA)

- Discuss other efforts for these species
  - Eel
  - Salmon
  - Others?
